

Project Location:  
Lynn, MA

Project Scope:  
New Construction

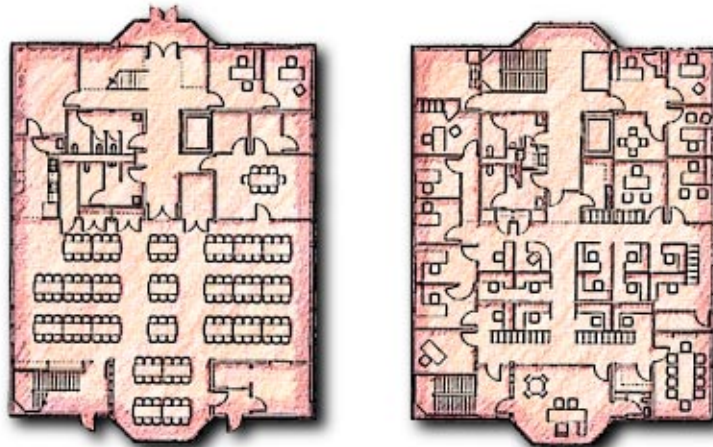

Building Size:  
10,000 s.f.

Building Type:  
Office/Senior Center

The new two-story brick veneer building houses Administrative Offices and a multi-functional Senior/Community Center. The painted aluminum curtain-wall frames and windows with energy efficient insulated glass allow natural light to flood this readily accessible versatile facility. The architecturally detailed brick veneer, aluminum windows and painted steel standing seam roof make the building virtually maintenance free. The location of the facility between two high-rise elderly housing structures and the covered veranda connecting them to the center add to the convenience and accessibility of this complex.
