

Project Location:
Worcester, MA

Project Scope:
Exterior Repairs & Restoration

Building Size:
40,000 s.f.

Building Type:
Government/Restoration

Building Owner:
Division of Capital Asset
Management

For this turn of the century building listed on the National Register of Historic Places, CSS designed exterior repairs and re-roofing for the Division of Capital Asset Management. In the 1970's, the original roofing systems were removed and replaced with contemporary materials. Working with the Massachusetts Historical Commission, CSS developed a combination repair and restoration program. In order to best allocate the construction budget, all roof surfaces visible from the exterior of the building were replaced with traditional materials of the original building period. Areas not visible from outside of the building were replaced with modern roofing materials. CSS designed custom copper fabrications to replicate materials of the original construction.
